Industrial Sales Company, Inc.

With over 30 years of irrigation product knowledge, sales and service, Industrial Sales Company can provide expert assistance to help you manage your project. Our Trained Staff can provide design and specification assistance, sales and field troubleshooting services.

Call today to schedule an appointment to review your system needs or to get product specifications for your next Central Control project.

Rain Bird Central Control Benefits:

- **Water Savings**—Effective Evapotranspiration (ET) based system management promoting Healthier Landscapes.
- **Reduced Labor Costs**—With control of irrigation schedules from a single PC, the User no longer needs to make schedule adjustments at the controller saving time, saving water and vehicle wear costs.
- **Damage Prevention**—The system monitors hydraulic conditions and takes action to prevent water damage in the case of pipeline breaks.
- **Non-Irrigation System Control**—Lighting, fountains, security gates and pumps can all be controlled and monitored by Rain Bird Central Control software.
